Hyundai Alcazar Facelift 2024

Hyundai Alcazar Facelift 2024: Ahead of its September 9 launch date, the Korean automaker has revealed the updated three-row SUV's design. Let's now take a closer look at the most noticeable outside changes.

Compared to the earlier iterations, which shared similar faces, the Hyundai Alcazar Facelift 2024 and the Creta variants have more identifiable fascias. Above the main headlamp clusters are the new H-shaped LED DRLs up front. The new grille is positioned above the 3D Hyundai logo. The bumper has also been slightly updated, with a wider silver-finished skid plate now attached.
